

SOI-200 and SOI-250 End-of-Life Notification

Due to current market conditions and the difficulty of securing aging parts, Spectrum Controls, Inc. will discontinue support and repairs for the SOI-200 and SOI-250. Our Service Center has developed three options to facilitate this transition for existing customers:

- 1. Repair of Defective Units (while replacement parts last):**
Contact the Service Center to discuss repair options. Replacement parts will be available on a first-come, first-served basis until current inventories are exhausted.
- 2. Keypad Replacement Kits:**
Spectrum Controls is offering a "last-time buy" for keypad replacement kits. Please review your requirements and place your "last-time buy" order before March 23, 2001. Contact the Service Center as soon as possible for price and availability.
- 3. Product Upgrade:**
The SOI-120 and SOI-260 operator interface products are the suggested upgrade. Data sheets for each of these products are included for your review. Contact our Inside Sales Department for price, availability and additional information.
